The Founder & The Mission

Built by an aircraft mechanic with zero-failure precision

Alasan

Founder & Lead Architect

 Lufthansa Technik

 West African Roots

 Mandinka Speaker

Not a Typical Startup Founder

Current Role: Aircraft Maintenance Mechanic at Lufthansa Technik, where I ensure the precision and safety of global aircraft engines beginning at 6:00 AM each day.

In the evenings, I apply that same **"zero-failure" mindset** to JulaZone. Raised in the markets of West Africa and fluent in Mandinka, I understand the culture of the Jula merchants intimately.

JulaZone is the **modern digital version** of that historical trade route—built with aircraft-grade precision for the African consumer.

"To bridge the trust and logistics gap between European quality and the African consumer."

Why This Matters

The Jula people have been merchants along the trans-Saharan trade routes for centuries. Their name means "trader" in Mandinka. JulaZone honors this legacy while modernizing it for the digital age—connecting Hamburg's quality standards with West African consumers through technology built by someone who understands both worlds.

2

The Technical Moat

AI-Native Infrastructure built with precision engineering

Metric	Value	Significance
Lines of Code	67,800+	Production-grade, custom-architected
Source Files	363	Full-stack architecture
Database Migrations	18	Comprehensive data schema
API Endpoints	30+	Complete REST API coverage
Test Cases	75+	Quality assurance

AI-First Development Approach

While many startups spend hundreds of thousands of Euros on development teams, I have leveraged an **AI-first mindset** to build a production-grade platform independently. AI agents serve as my high-velocity engineering team, enabling me to act as Lead Architect while achieving development scale that usually requires a full staff.

The codebase is developed with AI coders under my technical direction—a model that dramatically reduces costs while maintaining quality.

Technology Stack

Next.js 14

React 18

TypeScript

Google Gemini 2.0

Supabase

Tailwind CSS

Capacitor (Android)

Wave Money

Orange Money

For Customers

For Sellers

- ✓ AI Shopping Assistant (Gemini 2.0)
- ✓ Natural language search
- ✓ Personalized recommendations
- ✓ Mobile-first design
- ✓ African payment methods

- ✓ Complete boutique dashboard
- ✓ Product & inventory management
- ✓ Sales analytics
- ✓ Messaging system
- ✓ Payout management

3

Market Strategy – Banjul & Lagos

Two strategic entry points into the African market

Banjul

The Gateway

A stable, manageable market to refine our logistics and quality control operations.

- ✓ Stable regulatory environment
- ✓ Strong diaspora connections
- ✓ Ideal for operations testing
- ✓ Lower acquisition costs

Lagos

The Giant

The heart of African e-commerce, providing volume for rapid scale.

- ✓ 200M+ population market
- ✓ Africa's largest e-commerce
- ✓ Tech-savvy consumers
- ✓ High growth potential

Solving the "Trust Gap"

JulaZone ensures **European standards of quality control** from our Hamburg hub, delivered through a platform built specifically for the **African mobile-first consumer**. We bridge the gap that has historically prevented seamless trade between Europe and Africa.

Market Opportunity

African E-commerce
Market (2025)

\$75B

Internet Users in
Africa

400M+

Competitive Advantages

- ✓ **AI-First:** Built with AI from day one
- ✓ **Modern Tech:** No legacy debt

Mobile-First Access	80%
---------------------	-----

Youth Population (under 25)	50%
--------------------------------	-----

✓ **Local Focus:** African payments & delivery

✓ **Mobile-Native:** Optimized for how Africans shop

4

Execution Roadmap

Clear milestones from prototype to market leader

COMPLETE

Phase 1: Platform Architecture

Platform architecture and payment integrations finalized. Core marketplace functionality, AI shopping assistant, seller onboarding system, and Android app complete. 67,800+ lines of production code.

CURRENT

Phase 2: Pre-Seed Funding

Securing €300,000 Pre-Seed round to transition from solo "Mechanic/Architect" to operational CEO with dedicated focus on business growth.

NEXT 6 MONTHS

Phase 3: Team & Vendors

Recruit two specialized Full-Stack Engineers for 24/7 technical oversight and codebase management. Onboard first 50 vetted German vendors for quality products.

LAUNCH

Phase 4: Go Live

Live operations in Banjul followed by phased rollout in Lagos. iOS app launch, additional payment providers (Orange Money, MTN MoMo), and multi-language support.

Future Expansion (2027+)

Logistics partnerships &
fulfillment centers

B2B wholesale
marketplace

Pan-African expansion

5

The Investment Ask

From high-precision prototype to market leader

€300,000

Pre-Seed Round

Allocation of Funds

Team

Hiring 2 Full-Stack Engineers for 24/7 technical oversight

Focus

Founder transitions 100% from hangar to JulaZone operations

Growth

Marketing & vendor acquisition in Hamburg-West Africa corridor

"I am seeking a partner who values resilience, technical skin in the game, and the grit it takes to build a company while maintaining aircraft."

— Alasan, Founder

Why Invest Now?

- ✓ **Production-Ready:** Platform built with €0 external funding
- ✓ **Technical Moat:** 67,800+ lines of custom code
- ✓ **Unique Founder:** Cultural understanding + technical precision

✓ **Proven Execution:** Built while maintaining full-time job

✓ **Market Timing:** African e-commerce at inflection point
